

Optical Illusion-3D Hand Art

With VALS Artist: Tracy Tobin

What do you need?

>Check out the list in the first image >>>>>>>> 😊

A. Place your hand on the paper in the position you like then trace your hand with the pencil.

B. Outline your hand with a dark marker to make it more visible.

C. Using your ruler, add lines to the background behind your hand.

D. Nice even straight lines.

E. Match the background lines with curved lines in the fingers and hand.

F. Create a pattern with your colours.

G. Keeping the same colour pattern, fill in all the lines.

H. Colouring in the same direction of the line keeps it nice and neat.

I. Trace over all the lines with your dark marker.

J. Lightly add pencil shading to the outer edges of your hand.

K. Add additional shading in the areas between the knuckles

L. Using your fingertip or a tissue, smudge the pencil shading to create a more realistic shadow effect.

Congratulations, you did it!
